## Sanctuary

has provided a loving home for donkeys since 1998

Many of these intelligent & beautiful animals have health issues because of neglect in their past. Others are in their 20's & 30's, requiring extra care & special feeds to keep them healthy.

Some of our donkeys are in a safe environment, for the first time in their lives. They will never be used as roping donkeys again, or for any purpose except to help people understand how special they are.

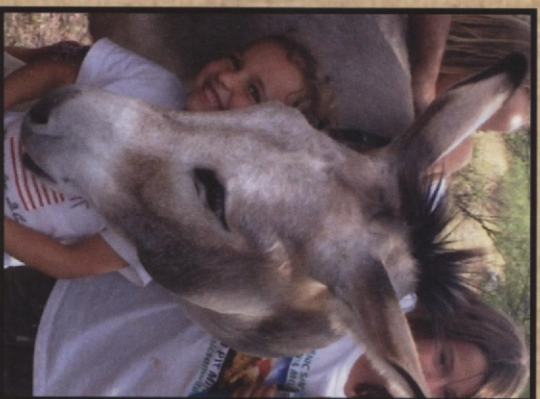

Although some of these wonderful creatures have learned to trust people, some will never trust again.

*When you do nothing, you feel overwhelmed and powerless. But when you get involved, you feel the sense of hope and accomplishment that comes from knowing you are working to make things better...!!*
